Introduction

Our business is 95% online so we don't use business cards much, but we hear so much about business cards being essential.

So we enlisted the help of our Party Network members to put a list of places together of where you can leave your business card.

One tip we want to give you about leaving business cards is to:

Include a code on each business card for a special offer. Write down on a notepad what the code is on each business card and where you left the card.

Then when you get an order, call, or anything from that card and they use the code you know where putting your business cards out at is working.
